Nama : Frederico Steven Kwok

NPM : 242310037

Kelas : TI-24-PA1

Mata Kuliah : Lab. Pemrograman Perangkat Bergerak

Tugas : Pertemuan 4 – Tugas dan Latihan

Github : https://github.com/RicoSteven120206/PPB-Praktikum-242310037.git

Buat sebuah app, dimana app tersebut akan menampilkan user list (4 - 6 user) Isi data dari tiap user = { nama, title, unit departement, email, portofolio = [{ code, nama, image }], dan gambar }; Pengumpulan di Github dengan commit "Quiz 1 PPB", dan kirim bukti ke lms

Ada 2 Halaman (Tak Perlu Terhubung):

1. User List
2. User Profile

Source Code:

components/quiz-1/userList.jsx

components > quiz-1 > userList.jsx > styles

```
8   const UserList = () => {
10    const [user, setUser] = useState(ListUser);    'setUser' is assigned a
11    const countUser = user.length;
12    const router = useRouter();
13    const handleProfile = (userId) => {
14      router.push({
15        pathname: "/module-quiz-1/profile",
16        params: { id: userId },
17      });
18    };
19
20    return (
21      <SafeAreaView style={styles.container}>
22        <View style={styles.header}>
23          <Text style={styles.text_header}>List User ({countUser})</Text>
24        </View>
25        <ScrollView
26          showsVerticalScrollIndicator={false}
27          contentContainerStyle={{ paddingBottom: 30 }}
28        >
29          <View style={styles.layout_card}>
30            {dataUser.map((user) => (
31              <CardProfile
32                key={user.id}
33                user={user}
34                onPress={() => handleProfile(user.id)}
35              />
36            ))}
37          </View>
38        </ScrollView>
39      </SafeAreaView>
40    );
41  };
```

Components/quiz-1/userProfile.jsx

```jsx
const UserProfile = () => {
  const { id } = useLocalSearchParams();
  const selectedUser = ListUser.find((user) => user.id == id);    Expec
  const router = useRouter();
  const handleBack = () => {
    router.back();
  };

  if (!selectedUser) {…
  }

  return (
    <SafeAreaView style={styles.container}>
      <TouchableOpacity onPress={handleBack} style={styles.btn_back}>
        <Ionicons
          name="arrow-back"
          size={17}
          color="white"
          style={{ marginRight: 6 }}
        />
        <Text style={{ fontWeight: 600, color: "white" }}>Back</Text>
      </TouchableOpacity>
      <View style={styles.profile}>…
      </View>
      <View style={{ flexDirection: "column", flex: 1 }}>…
      </View>
    </SafeAreaView>
  );
};
```

Components/quiz-1/components/card_profile.jsx

```jsx
const CardProfile = ({ user, onPress }) => {
  return (
    <View style={styles.container}>
      <View style={styles.image}>
        <Image
          source={user.image}
          style={{ width: "100%", height: 180, borderRadius: 15 }}
        />
      </View>
      <View style={styles.content}>
        <Text style={styles.name}>{user.name}</Text>
        <Text style={styles.text_card}>{user.title}</Text>
        <Text style={styles.text_card}>{user.departement}</Text>
        <Text style={styles.text_card}>{user.email}</Text>
      </View>
      <View style={styles.btn}>
        <TouchableOpacity style={styles.btn_porto} onPress={onPress}>
          <Text style={styles.btn_text}>Portofolio </Text>
          <Ionicons
            name="briefcase"
            size={10}
            color="gray"
            style={{ marginLeft: 4 }}
          />
        </TouchableOpacity>
      </View>
    </View>
  );
};
```

Components/quiz-1/components/card_portofolio.jsx

```jsx
const CardPortofolio = ({ porto }) => {
  return (
    <View style={styles.container}>
      <View style={styles.image_wrap}>
        <Image
          source={porto.imagePorto}
          style={{ width: "100%", height: 160, borderRadius: 15 }}
          resizeMode="cover"
        />
      </View>
      <View
        style={{
          justifyContent: "center",
          alignItems: "center",
          padding: 4,
          gap: 2,
          borderTopWidth: 4,
          borderRadius: 4,
          borderTopColor: "#3e7bff",
        }}
      >
        <Text
          numberOfLines={2}
          style={{ fontWeight: 700, textAlign: "center" }}
        >
          {porto.namePorto}
        </Text>
        <Text>Code: {porto.code}</Text>
      </View>
    </View>
  );
};
```

Constants/list_users.jsx

Pemisalan 1 contoh data Object

```object
{
  id: 2,
  image: require("../assets/users/anton jadi presiden.png"),
  name: "Budi Santoso",
  title: "Backend Engineer",
  departement: "Engineering",
  email: "budi.backend@gmail.com",
  portofolio: [
    {
      code: "BE001",

Latihan 3: Laporan Singkat

1. Buatlah dokumentasi dalam mengerjakan soal Quiz 1 di LMS, dengan memberikan Screenshot baik dari sisi aplikasi ataupun code yang sudah dimodifikasi dengan penjelasan dan alur yang baik dan benar. Dokumentasi disimpan dalam bentuk PDF dan ditaruh dalam project react expo yang telah anda kerjakan.
2. Upload project tersebut pada GITHUB yang telah dibuat sebelumnya di repository "PPB-Praktikum-NPM", namun commit dengan nama "PPB Quiz 1".
3. Pengumpulan Tugas Latihan Praktikum dikumpulkan selama 1 minggu kedepan sejak hari ini (sesuai dengan jadwal praktikum).
